Experience

Centro

Lead Software Engineer - Toronto, ON, Apr / 2018 - Present Senior Software Engineer - Toronto, ON, Jan / 2016 - Apr / 2018

- Led a cross-functional team of 3 engineers, 1 PM, and 1 QA to deliver complex features on a timely basis with a high degree of quality.
- Provided technical mentorship and coaching for engineers, providing feedback in monthly 1-1s and quarterly reviews.
- Contributed to hiring committee as an interviewer focusing on frontend topics.
- Responsible for architectural guidance and decisions in the form of RFCs for the future of the product.
- Implemented or oversaw the majority of features in the Basis Platform DSP a product drives 90% of Centro's software revenue growing at 25% YoY.

Yahoo! (Flickr)

Front-End Engineer - San Francisco, CA, April / 2014 - Dec / 2015

- Built many of the shared components and the most highly trafficked pages (Photostream, Faves, Albums) of the Flickr 4.0 redesign as a single page isomorphic app.
- Responsible for building out the frontend of Flickr's checkout/wallet/payouts experience.
- Improved performance of Flickr web embeds (Embedr) by over 100% by rebuilding as an Express app with over 94% test coverage. Embedr drove a 20% increase in DAUs after launch.

UXP Systems

Front-End Developer - Toronto, ON, November / 2012 - March / 2014

- Primary developer for UXP's single-page JavaScript applications on multiple platforms using Backbone.is, SASS, and RequireJS.
- Quickly learned and executed a proof of concept SVG DOM-based single page Backbone.js application for use on set-top boxes with limited hardware - resulting in a contract with Rogers Communications worth \$10MM.
- Developed a proof of concept for Ericsson's Mediaroom platform, successfully securing a contract with Ericsson for \$10MM (using Presentation Framework, ASP.NET, nginx, Redis, xslt, Backbone.js).
- Produced and taught a workshop for partners about UXP's JavaScript SDK.

Avaya

Software Engineer - Belleville, ON, December / 2011-September / 2012

- Part of the SIP96X1 Deskphone team working on UI, signalling/networking, and memory management in an embedded Qt/C++ environment.
- Researched and implemented changes to phone features, reducing server load by more than 50% in large call center environments.
- Created an internal tool using Bootstrap and the Flot library to monitor thousands of clients worldwide, allowing the team to efficiently measure and debug core dump issues prior to product release.

Projects

- Presets.io OSX and Windows app for managing Adobe Lightroom photography presets. Built with Electron, Node.js, and React.
- <u>Hiresync.io</u> Real-time collaborative coding platform for technical interviews. Backbone.js, Express, Socket.io, Firebase, and MongoDB.

Skills

- Passion for modern JavaScript and frameworks (React, Redux, Next.js, Express) and tooling (Webpack).
- Proficient in various languages and frameworks including Ruby on Rails and Java w/ Spring Boot.
- Unit testing with Jasmine, Rspec, and functional testing with Protractor.
- Extensive experience with Redis, MongoDB, and PostgreSQL.

Education

University of Guelph

BSc, Computer Science
